

The Regional Greenhouse Gas Initiative

an initiative of Eastern States of the US

Summary of State Set-Aside Programs

RGGI states' CO₂ budget trading programs may include the establishment of state-specific set-aside programs, which allow a state to hold a limited number of CO₂ allowances in set-aside accounts to retire, allocate, or otherwise distribute outside of the RGGI auctions process.

Included below is a summary of state set-aside programs. To learn more about a specific set-aside program, you can refer to the relevant [state regulations](#).

Connecticut	Voluntary Clean Energy Purchase Set-Aside Customer-side Distributed Resources (CDR) Set-Aside Combined Heat and Power Useful Thermal Energy Set-Aside
Delaware	N/A
Maine	Voluntary Renewable Energy Set-Aside Integrated Manufacturing Facility Pre-Retirement Set-Aside
Maryland	Limited Industrial Exemption Set-Aside Long Term Contract Set-Aside Clean Generation Set-Aside
Massachusetts	Voluntary Renewable Energy Set-Aside Useful Net Thermal Energy Retirement Set-Aside
New Hampshire	Voluntary Renewable Energy Market Set-Aside Emergency Set-Aside
New Jersey	Fixed Price Contract Set-Aside Cogeneration Set-Aside
New York	Voluntary Renewable Energy Market and Eligible Biomass Set-Aside Long Term Contract Set-Aside
Rhode Island	Voluntary Renewable Energy Market Set-Aside
Vermont	Voluntary Renewable Energy Set-Aside
Virginia	N/A
