- Update on IPM input and review process
 - Presentation on REMI economic modeling plans
- 3:30 **Next Steps/Wrap Up**
- 3:45 **Adjourn**

Outline of Key Policy Issues (Updated 5/17/2004)

(E) Allocations.

- (1) How will each state's cap be allocated?
- (2) Will a uniform regional allocation method be chosen or will states choose different allocation methods?
- (3) Will auctions, output-based, input-based, fuel-neutral, fuel specific, or another allocation method be chosen? Should allocations be made to load or generation?
- (4) Will allocations be made only to sources covered by the cap or will they be made to non-emitting generators?
- (5) How will historical or early reductions be treated?
- (6) How will new sources be handled?
- (7) How will retired sources be handled?
- (8) How will re-powering of units be handled?
