---

Thank you for organizing the RGGI Program Review on Sept. 19, 2011. As a resident of the northeastern US, I attended the stakeholder meeting to learn more about regional initiatives and see to what extent the cooperation between neighboring states and market-driven tools were effective in reducing carbon emissions and influencing natural resource preservation. I realize it takes a great deal of political will and a comprehensive environmental policy to reach these critical, long-term objectives. However, given the projected increase in the proportion of natural gas and wind power presented in the afternoon session, I would like to take this opportunity to respectfully suggest that water and noise pollution, in addition to air pollution, be taken into consideration in the results/environmental impact section of the RGGI model.

Karen A.

Best Regards,

Karen
