

2/19/2016

Dear RGGI States,

The 2,490 Sierra Club activists listed below have signed on to the following comments by the Sierra Club via an online petition:

Thank you for your continued leadership to build a clean energy economy and reduce carbon pollution in the Northeast through the Regional Greenhouse Gas Initiative (RGGI). As you consider future policy scenarios to explore through the 2016 Program Review, we encourage you to ensure the program is consistent with avoiding the worst impacts of climate disruption and meeting our state climate goals.

I applaud initial plans to consider reducing pollution by more than 20 million tons from 2020 to 2030 and eliminating the dangerous loopholes of offsets and the cost containment reserve. However, analysis by Synapse Energy Economics shows we need even deeper early reductions in carbon pollution from the electric sector. As such, in addition to that scenario, I encourage you to support evaluating more ambitious cap reductions as well.

Since RGGI was enacted, climate-disrupting carbon pollution from power plants in the region has declined nearly 5% a year, and the revenues raised to date are projected to save \$2.9 billion for households and businesses and create tens of thousands of new jobs. By continuing that progress - an additional 5% annual decline in pollution from 2020-2030 - we can generate even more benefits for our communities.
