

Dear RGGI Board,

The 2,404 Sierra Club activists listed below have signed on to the following comments by the Sierra Club via an online petition:

*“Please continue leadership to reduce carbon emissions in the Northeast through the Regional Greenhouse Gas Initiative.*

*The Northeast has the opportunity to continue as America’s clean energy leader, paving the way with aggressive carbon reductions and smart investment in clean, renewable energy options like wind, solar and energy efficiency.*

*The Regional Greenhouse Gas Initiative provides the framework by which states across the region can double down on job creating clean energy programs, ensuring good paying, homegrown jobs for folks from Delaware to Maine while cutting climate disruption causing carbon pollution out of our energy diet.*

*To do so, our Governors must take forward thinking and aggressive steps to cut carbon out of our electricity sector. Now is the time for our leaders to commit to a region wide goal of cutting 40% of all carbon pollution by 2030.*

*To date the RGGI program has saved folks across the region \$395 million dollars on their electric bills and taken the equivalent of 245,000 cars off the road, that’s real progress towards a carbon free, clean energy future, but we can do more, faster.*

*The Northeast can have a carbon free future, but our leaders must take the visionary steps to make it happen. As you review the future of the RGGI program as part of the 2016 Program Review, we are asking you to:*

*Set a RGGI cap level consistent with state climate targets of 40% economy-wide reductions by 2030. Eliminate the cost containment reserve, which allows power plants to increase pollution if prices rise to certain levels. Conduct an environmental justice analysis to ensure there are no disproportionate impacts to vulnerable communities as part of the 2016 Program Review. Continue to require power plants to buy allowances for 100% of their carbon pollution, and use those proceeds primarily for energy efficiency and investments in most impacted communities (i.e. low income assistance, communities with power plant retirements, workers, etc..) Only link the RGGI program (for purposes of trading carbon pollution) with states that have requirements that are similarly more ambitious than the Clean Power Plan.*

*Thank you for your continued leadership to build a clean energy economy and reduce carbon emissions in the Northeast.”*
