A recorded version of the webinar will be made available on the Auction Materials Webpage no later than 5:00 PM ET on Monday, July 15, 2019.

The Auction Materials webpage can be visited at <https://rggi.org/auctions/auction-materials>.

About the Regional Greenhouse Gas Initiative

The New England and Mid-Atlantic states participating in the fourth RGGI control period (Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New York, Rhode Island, and Vermont) have implemented the first mandatory market-based regulatory program in the U.S. to reduce greenhouse gas emissions. The 2019 RGGI cap is 80.2 million short tons. The RGGI cap declines 2.5 percent each year from 2015-2020. The RGGI states also include interim adjustments to the RGGI cap to account for banked CO₂ allowances. The 2019 RGGI adjusted cap is 58.3 million short tons.

RGGI is composed of individual CO₂ budget trading programs in each state, based on each state's independent legal authority. A CO₂ allowance represents a limited authorization to emit one short ton of CO₂, as issued by a respective state. A regulated power plant must hold CO₂ allowances equal to its emissions to demonstrate compliance for each three-year control period. RGGI's fourth control period began on January 1, 2018 and extends through December 31, 2020. For more information, visit www.rrgi.org.

About Regional Greenhouse Gas Initiative, Inc.

Regional Greenhouse Gas Initiative, Inc. (RGGI, Inc.) was created to provide technical and administrative services to the states participating in the Regional Greenhouse Gas Initiative. RGGI, Inc. is a 501(c)(3) nonprofit organization. For more information, visit <https://rggi.org/rggi-inc/contact>.
