Confidential Information

- Applicant may not publicly release confidential information
  - Confidential information includes, but is not limited to, qualification status, bidding strategy, bid price and/or bid quantity information, and information on financial security to the extent such information is not generally available to the public
After the relevant *Qualification Application* filing deadline, an Applicant may not communicate with any other Applicant or party about the RGGI auction that has not been disclosed in its qualification application, except as requested by the Auction Manager to remediate a *Qualification Application*. 
Auction Overview [1]

- Electronic, internet-based auction platform
- Uniform-price, sealed-bid (single-round) auction format
- Bids ranked by their bid price from high to low
  - Cumulative demand noted at each bid price
- Auction includes a Cost Containment Reserve (“CCR”)
  - Auction 47 will contain 11,800,000 allowances
- Auction Notice provides clear guidance on determining the interim and final clearing price and allowance awards
- All marginal bid ties will be resolved by a random tiebreaking process
Auction Overview [2]

• All bids that exist in the Auction Platform via user submission at the close of the auction will be considered binding offers and eligible for award
  • Contingent bids are not permitted
• Each bid price must be submitted in dollars and whole cents
• Each bid quantity must be submitted in multiples of 1,000
• Bidders can submit an unlimited number of bids; however, only one bid may be submitted for any given price
• Bidders can cancel or change their bids at their discretion until the bidding window closes
Bid Limitations [1]

• Reserve Price
  • The reserve price is $2.32 per CO₂ allowance

• Financial Security
  • The value of a bidder’s bids cannot exceed the amount of a bidder’s financial security
  • The value of a bidder’s bids is the maximum value the bidder would be liable to pay in a uniform-price auction format
    • This is the same approach utilized since Auction 2
• Quantity of CO₂ Allowances
  • The maximum number of CO₂ allowances that an entity (i.e., an individual person, or an organization and its affiliates and/or agents), may bid for in a single auction is 25% of the CO₂ allowances offered for sale (“Initial Offering”)
  • Applicants are associated if they have ties that could allow them to act in concert or that could prevent them from competing actively against each other in an auction
  • There is no prohibition against associations among bidders; however, they must be disclosed properly
Bid Limitations [3]

- Quantity of CO₂ Allowances (cont.)
  - Corporate Associations
    - See Auction Notice for corporate association definition
  - Bidding Associations
    - Bidding associations only relate to CO₂ allowances offered for sale in a RGGI auction
    - See Auction Notice for bidding association definition
- All bid limitations are evaluated at the time of submittal
- The Auction Platform will not allow bids that violate any bid limitation to be submitted
Cost Containment Reserve Overview and Mechanics

- The CCR is designed to moderate the price of CO₂ allowances
  - The CCR contains a number of CO₂ allowances that, under certain circumstances, will be offered for sale
- Once the pool of CO₂ allowances available in the CCR is exhausted, no CCR Allowances will be available for the remainder of that calendar year
- The CCR trigger price (“CCR Trigger Price”) for Auction 47 is $10.77
Mechanics of the CCR: Clearing Price and Allowance Awards [1]

Scenario No. 1 – Total Demand ≤ Initial Offering

- **Step 1: The Interim Clearing Price**
  - Interim Clearing Price = Minimum Reserve Price

- **Step 2: CCR Allowances to be Released & Final Clearing Price**
  - Zero CCR allowances are released in this scenario
  - Final Clearing Price = Interim Clearing Price

- **Step 3: CO₂ Allowance Award**
  - Allowances awarded to all bidders
**Mechanics of the CCR: Clearing Price and Allowance Awards [2]**

**Scenario No. 2 – Total Demand > Initial Offering, CCR is not Triggered**

- **Step 1: The Interim Clearing Price**
  - Interim Clearing Price < CCR Trigger Price

- **Step 2: CCR Allowances to be Released & Final Clearing Price**
  - Zero CCR allowances are released in this scenario
  - Final Clearing Price = Interim Clearing Price

- **Step 3: CO₂ Allowance Award**
  - Allowances awarded to bids with bid prices > Final Clearing Price
  - Tie breaker may apply for bids with bid prices = Final Clearing Price

Scenarios 3a – Total Demand > Initial Offering, CCR is Triggered

- **Step 1:** The Interim Clearing Price
  - Interim Clearing Price > CCR Trigger Price

- **Step 2:** CCR Allowances to be Released & Final Clearing Price
  - CCR allowances are released in this scenario until Final Clearing Price = CCR Trigger Price

- **Step 3:** CO₂ Allowance Awarded
  - Allowances awarded to bids with bid prices > Final Clearing Price
  - Tie breaker may apply for bids with bid prices = Final Clearing Price
Mechanics of the CCR: Clearing Price and Allowance Awards [3b]

Scenario No. 3b – Total Demand > Initial Offering, CCR is Triggered

• Step 1: The Interim Clearing Price
  ▪ Interim Clearing Price > CCR Trigger Price

• Step 2: CCR Allowances to be Released & Final Clearing Price
  ▪ CCR allowances are released in this scenario until CCR is exhausted

• Step 3: CO₂ Allowance Awarded
  ▪ Allowances awarded to bids with bid prices > Final Clearing Price
  ▪ Tie breaker may apply for bids with bid prices = Final Clearing Price
Auction Format Example No. 1

- Sample auction for 100,000 CO₂ allowances
- The minimum reserve price is $2.15 per CO₂ allowance
- All bids are ranked by bid price from high to low
- Cumulative demand is noted at each bid
- Awards made until supply of CO₂ allowances is exhausted, which is Bidder C’s bid at $3.85

- Clearing price is the bid price of the tied bids after the marginal bid, or $3.80 per CO₂ allowance
Auction Format Example No. 2

- Bidders E, D, A, & B all submit bids at $3.75 causing cumulative demand to exceed supply
  - Sample auction for 100,100 CO₂ allowances
  - Clearing price is the bid price of the marginal bids, or $3.75 per CO₂ allowance
  - Allowances awarded to all bids with bid prices greater than $3.75
- Marginal bid ties are broken by a random process

- Step 1: The Interim Clearing Price
  - Bidder C’s bid causes cumulative demand to equal supply
  - Interim clearing price is the bid price after the marginal bid
Step 2: CCR Allowances to be Released and the Final Clearing Price
Since the interim clearing price is above the CCR Trigger Price, CCR Allowances are released until:
- The final clearing price equals the CCR Trigger Price; or
- The CCR is exhausted
In this example, the CCR is not exhausted (97,000 out of 100,000 CCR)

Step 3: CO₂ Allowance Awards
- Allowance awards are made using the ranked bids
- Awards to bids with price greater than or equal to the final clearing price
**Bid Value Example No. 1**

- Bids are ranked by bid price from high to low
- Bid price is multiplied by the bidder’s cumulative demand at that bid price to calculate a bid value
- The largest bid value calculated and therefore the maximum cost, is the total value of the bidder’s bids and is counted against the financial security bid limit - $100,800

Bid Value Example No. 2

- Bids are ranked by bid price from high to low
- Bid price is multiplied by the bidder’s cumulative demand at that bid price to calculate a bid value
- The largest bid value calculated and therefore the maximum cost, is the total value of the bidder’s bids and is counted against the financial security bid limit
- In this example, $93,750 is deducted from the financial security bid limit

If this bid is accepted, Bidder B wins 10,000 CO₂ allowances and pays at most $4.10 per CO₂ allowance

If this bid is accepted, Bidder B wins 25,000 CO₂ allowances and pays at most $3.75 per CO₂ allowance

Bidder B’s maximum bid value is counted against the financial security bid limitation $93,750.00
