CO₂ Budget Source 2019 Interim Control Period Compliance Process Checklist: 6 Steps

Under each RGGI participating state’s CO₂ Budget Trading Program, each “CO₂ budget source” is required to hold one CO₂ allowance for each ton of CO₂ emitted during the preceding three-year control period. The fourth three-year control period began on January 1, 2018 and extends through December 31, 2020 for the states of Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New York, Rhode Island, and Vermont.

Starting in the third control period, each CO₂ budget source must hold allowances equal to 50 percent of their emissions during each interim control period (the first two calendar years of each three-year control period). Each CO₂ budget source must hold allowances equal to 100 percent of their remaining emissions for the three-year control period at the end of the three-year control period.

The 2019 interim control period began on January 1, 2019 and each CO₂ budget source must hold allowances available in their compliance account for compliance deduction equal to 50 percent of their emissions by March 2, 2020.

☐ 1. Confirm your access to the U.S. EPA’s CAMD Business System.
   Facility information for CO₂ budget sources is stored and maintained in the U.S. Environmental Protection Agency’s (U.S. EPA’s) Clean Air Markets Division (CAMD) Business System (CBS), and reflected in the RGGI CO₂ Allowance Tracking System (RGGI COATS). Please make sure you have an Authorized Account Representative (AAR) and Alternate Authorized Account Representative (AAAR) (if applicable) with access to the CAMD Business System. Please also make sure all information about your facility (including AAR, AAAR, facility, and owner/operator) is up to date in the CAMD Business System. Updates made in the CAMD Business System flow directly into RGGI COATS periodically. If you need to change your AAR or make changes that cannot be made in the CAMD system, this may take additional time and require paper forms to be sent to the EPA and to the state in which your CO₂ budget source resides. Please plan accordingly.

☐ 2. Confirm your user registration in RGGI COATS.
   RGGI COATS stores and maintains RGGI accounts and CO₂ allowances, and is the vehicle in which compliance transactions and evaluations will be made. Please ensure that your organization’s Authorized Account Representative (AAR), Alternate Authorized Account Representative (AAAR) (if applicable), and any Electronic Submission Agent(s) (Agent(s)) (if applicable) for RGGI COATS are up-to-date and have access to RGGI COATS. Note that AAR, AAAR, and facility data is managed in the EPA CAMD system, and transferred into COATS. This data is not managed in RGGI COATS. For more information on RGGI COATS, please see the RGGI COATS User’s Guide.

☐ 3. Acquire sufficient CO₂ allowances to meet your CO₂ Interim Compliance Obligation.
   Market participants can obtain CO₂ allowances in two ways:
   ▪ RGGI CO₂ Allowance Auctions: Auctions are held quarterly. Auction 46, to be held on December 4, 2019, is the last CO₂ Allowance Auction before the end of the 2019 interim control period. The Auction 46 Notice will be released by October 8, 2019. For more information on CO₂ Allowance...
Auctions, including requirements and procedures to participate in the auctions, please see the [Auctions](#) section of the RGGI website.

- **Secondary Markets:** CO₂ allowances can also be obtained through secondary markets. All CO₂ allowances for the 2019 interim control period must be provided for compliance by 11:59 PM ET on March 2, 2020 (see item 6 below). It is strongly recommended that you obtain all CO₂ allowances necessary for compliance *well before* the Allowance Transfer Deadline.

☐ 4. **Submit your CO₂ emissions data to the U.S. EPA by January 30, 2020.**

CO₂ emissions data for Q4-2019 (the final quarter of the 2019 interim control period) must be submitted to the U.S. EPA’s CAMD Business System no later than January 30, 2020. Please note that CO₂ emissions data updates for 2019 will continue to flow to RGGI COATS from the CAMD Business System through final interim compliance true-up. If there are any changes to CO₂ emissions data, the relevant state, AAR, AAAR (if applicable), and any Agent(s) (if applicable) associated with the Compliance Account will be notified via RGGI COATS. Any data updates and potential effects on a CO₂ budget source’s “CO₂ Interim Compliance Obligation” (50 percent of the tons of CO₂ emitted during the preceding one-year interim control period, less any exempted emissions deductions) will be reviewed by the relevant state.

☐ 5. **Run Draft True-Up in RGGI COATS by March 2, 2020.**

CO₂ budget sources must run draft “true-up” in RGGI COATS by 11:59 PM ET on March 2, 2020. This will compare the CO₂ Interim Compliance Obligation to the sum of CO₂ allowances surrendered and held in the Compliance Account for automatic deduction at the time that the most recent draft true-up is run. CO₂ budget sources may run draft true-up as many times as needed.

☐ 6. **Provide sufficient CO₂ allowances in a RGGI COATS Compliance Account for interim compliance by the Allowance Transfer Deadline (March 2, 2020).**

All CO₂ budget sources must hold sufficient CO₂ allowances in their Compliance Account (not including any CO₂ allowances surrendered) to meet their CO₂ Interim Compliance Obligation in RGGI COATS by 11:59 PM ET on March 2, 2020. Following the Allowance Transfer Deadline, on March 3, 2020, CO₂ allowances will be automatically deducted from the CO₂ budget source’s Compliance Account and transferred to the states’ Surrender Accounts in order of increasing serial number, with the following exceptions:

- **For CO₂ budget sources located in Connecticut, Delaware, Massachusetts, New Hampshire, New York, Rhode Island or Vermont:** CO₂ offset allowances, up to the 3.3 percent offset limit, will be deducted in chronological order (CO₂ offset allowances from earlier allocation years shall be deducted before CO₂ offset allowances from later allocation years), in order of increasing serial number for each year. CO₂ allowances, other than CO₂ offset allowances, will then be deducted in chronological order (CO₂ allowances from earlier allocation years will be deducted before CO₂ allowances of later allocation years), in order of increasing serial number for each year.

- **For CO₂ budget sources located in Maine:** CO₂ allowances that were allocated to units at the source will be deducted before other CO₂ allowances, in order of increasing serial number. CO₂ allowances that were allocated to units at the source include: CO₂ allowances allocated from the state of Maine’s Integrated Manufacturing Facility (IMF) Account. Any other allocated CO₂ allowances, other than CO₂ offset allowances, will then be deducted in order of increasing serial number for each year. Then CO₂ offset allowances, up to the 3.3 percent offset limit, will be deducted in chronological order in order of increasing serial number for each year.
- **For CO2 budget sources located in Maryland:** CO2 allowances that were allocated to units at the source will be deducted before other CO2 allowances, in order of increasing serial number. CO2 allowances that were allocated to units at the source include: CO2 allowances allocated from the state of Maryland’s Long Term Contract Set-aside Account or Clean Generation Set-aside Account. CO2 offset allowances, up to the 3.3 percent offset limit, will then be deducted in chronological order (CO2 offset allowances from earlier allocation years shall be deducted before CO2 offset allowances from later allocation years), in order of increasing serial number for each year. Then CO2 allowances, other than CO2 offset allowances, will be deducted in chronological order (CO2 allowances from earlier allocation years will be deducted before CO2 allowances of later allocation years), in order of increasing serial number for each year.

As an optional step, if you wish to identify specific CO2 allowances to use for interim compliance (or “surrender” CO2 allowances), you may do so by using the Compliance Deduction Transaction in RGGI COATS between January 31, 2020 and March 2, 2020. Any CO2 allowances identified by a CO2 budget source will be transferred from your Compliance Account to your relevant state’s Surrender Account for interim compliance at the point of the transaction, prior to the March 2, 2020 allowance transfer deadline. Any remaining balance of CO2 allowances needed to meet your CO2 Interim Compliance Obligation (as determined by your state) will be automatically deducted as described above following the allowance transfer deadline, on March 3, 2020.

For more information on RGGI COATS transactions, please see the RGGI COATS User’s Guide. For more information on state CO2 Budget Trading Programs, see: [https://www.rggi.org/program-overview-and-design/state-regulations](https://www.rggi.org/program-overview-and-design/state-regulations).

### Additional Information:

- The compliance process for CO2 budget sources is governed by the applicable CO2 Budget Trading Program of the participating state in which the facility is located. For more information, see: [https://www.rggi.org/program-overview-and-design/state-regulations](https://www.rggi.org/program-overview-and-design/state-regulations).
- For a list of current CO2 budget sources, see the public Sources Report on the RGGI COATS Home Page: [rggi-coats.org](http://rggi-coats.org).
- To learn more about CO2 Budget Source (RGGI) Compliance, see the RGGI website: [https://www.rggi.org/allowance-tracking/compliance](https://www.rggi.org/allowance-tracking/compliance) and the RGGI Compliance Fact Sheet.
- For questions related to using RGGI COATS please email [rggi-coats@csra.com](mailto:rggi-coats@csra.com). For other questions related to compliance, please contact the appropriate state representative below:
