

Regional Greenhouse Gas Initiative

an Initiative of the Northeast and Mid-Atlantic States of the U.S.

STAKEHOLDER WEBINAR: AUGUST 13, 2012

AGENDA & LOGISTICS

On behalf of the states participating in the Regional Greenhouse Gas Initiative (RGGI), RGGI, Inc. will facilitate a **Stakeholder Webinar** on program review on August 13, 2012.

WHEN:

Monday, August 13, 2012, 1:00 PM-3:00 PM ET. Please pre-register no later than Monday, August 13, 2012 by 10:00 AM ET.

PURPOSE:

The RGGI states are continuing the 2012 program review called for in the RGGI Memorandum of Understanding (MOU). Program review is a comprehensive evaluation that is part of the RGGI states' continued commitment to the environmental integrity of the RGGI program and the long-term development of the RGGI market.

To support program review, this meeting will solicit stakeholder input on IPM electricity sector modeling. The states are seeking stakeholder comment on the results of the revised 2012 Reference Case and sensitivities modeling. The modeling, along with other information to be gathered throughout 2012, would be considered to support evaluation of any potential modifications to the RGGI program. For more information on program review, visit http://www.rggi.org/design/program_review.

COMMENTS, QUESTIONS, AND ANSWERS:

Participants are encouraged to submit questions and comments via audio and chat during the live webinar session.

Any additional comments are requested by Monday, August 20 at 4:00 PM ET to allow for consideration as the states continue IPM modeling. Throughout 2012 there will be continuous opportunity for stakeholder comments. Though written comments are requested by Monday, August 20, all submitted comments are reviewed by the states. Written comments should be submitted via email to info@rggi.org.

Webinar presentation materials will be posted at www.rggi.org once available.

Please provide comments or suggestions regarding the results of the updated reference case and sensitivity analyses and any comments on considerations for IPM potential scenario modeling.
