

Regional Greenhouse Gas Initiative, Inc. Spring Internship

The Regional Greenhouse Gas Initiative, Inc. (RGGI, Inc.) seeks to hire a (unpaid, for-credit) student intern for the Spring 2019 semester.

RGGI, Inc. is a non-profit corporation established to support the implementation of RGGI---the nation's first mandatory, market-based program to reduce greenhouse gas emissions. The nine states participating in RGGI have reduced carbon pollution while supporting economic growth, and reinvesting in a cleaner and more efficient energy system. Interning at RGGI, Inc. offers an exciting opportunity to learn more about how this successful program works on a daily basis, and to gain experience in greenhouse gas reduction, energy programs, and policy communications.

Candidates must be full-time students, and may use the internship to earn academic credit. The internship is scheduled for January through May 2019. Start dates, end dates, and hours are flexible according to the intern's class schedule, but it is expected that interns could commit to 6-10 hours per week.

Working with the Director of Communications and other RGGI, Inc. staff, the intern will assist in the monitoring and tracking of media coverage, changes to RGGI source ownership, electricity use in the RGGI region, and other metrics. The intern will assist in keeping stakeholders and the public informed about RGGI. Potential tasks include:

- Monitoring RGGI's presence in the news media and summarizing trends.
- Researching and reviewing databases, spreadsheets, and economic modeling.
- Assisting with the preparation of presentations, graphs, fact sheets, summaries of academic reports, and other materials.
- Assisting with updates and improvements to the website.

Qualifications include:

- Strong research and written communication skills.
- Coursework or experience in communications, media relations, economics, environmental science and/or policy.
- Proficiency in MS Office suite.
- Positive attitude with motivation to take on new projects.
- Familiarity with greenhouse gas emissions programs a plus.
- Full time undergraduate or graduate student.

To apply, please send a cover letter and resume to (info@rggi.org) by January 18, 2019. Applicants will be considered on a rolling basis.
