ARTICLE 5 AS AMENDED

RELATING TO ENERGY AND THE ENVIRONMENT

SECTION 1. Section 23-82-6 of the General Laws in Chapter 23-82 entitled "Implementation of the Regional Greenhouse Gas Initiative Act" is hereby amended to read as follows:

23-82-6. Use of auction or sale proceeds.

(a) The proceeds from the auction or sale of the allowances shall be used for the benefit of energy consumers through investment in the most cost-effective available projects that can reduce long-term consumer energy demands and costs. Such proceeds may be used only for the following purposes, in a proportion to be determined annually by the office in consultation with the council and the board:

(1) Promotion of cost-effective energy efficiency and conservation in order to achieve the purposes of § 39-1-27.7;

(2) Promotion of cost-effective renewable non-carbon emitting energy technologies in Rhode Island as defined in § 39-26-5 and to achieve the purposes of chapter 26 of title 39 entitled “Renewable Energy Standard”;

(3) Cost-effective direct rate relief for consumers;

(4) Direct rate relief for low-income consumers;

(5) Reasonable compensation to an entity selected to administer the auction or sale; and

(6) Reasonable costs of the department of environmental management and office of energy resources in administering this program, as well as other climate change, energy efficiency, and renewable program efforts of the department of environmental management and office of energy resources, which shall not in any year exceed three hundred thousand dollars ($300,000) or ten percent (10%) of the proceeds from sale or auction of the allowances, whichever is greater. Administrative funds not expended in any fiscal year shall remain in the administrative account to be used as needed in subsequent years. The office of energy resources shall have the ability to apply administrative funds not used in a fiscal year to achieve the purpose of this section. The funds deposited into the administrative funds account shall be exempt from the indirect cost recovery provisions of § 35-4-27.1.

(7) For fiscal year 2023 only, the office of energy resources shall transfer $3,000,000 from
unallocated auction proceeds to the executive climate change coordinating council restricted receipt
account to maintain funding for the existing electric vehicle and electric bicycle incentive programs
and to support other projects; and

(8) Provided however, effective for fiscal year 2024 and thereafter, sale of allowances
yielding in excess of four million five hundred thousand dollars ($4,500,000) per auction shall be
transferred to the Rhode Island office of energy resources, on behalf of the executive climate change
coordinating council, for climate change related initiatives. The executive climate change
coordinating council shall have exclusive authority to direct the use of these funds pursuant to §
42-6.2-3.1. The office of energy resources may act on behalf of the executive climate change
coordinating council to disburse these funds. Provided further, that any transfer of allowances in a
single fiscal year, pursuant to this section shall not exceed one million five hundred thousand
dollars ($1,500,000).

(b) Any interest earned on the funds so generated must be credited to the fund. Funds not
spent in any fiscal year shall remain in the fund to be used for future energy efficiency and carbon
reduction programs.

(c) Annually, the office, in consultation with council and board, shall prepare a draft
proposal on how the proceeds from the allowances shall be allocated. The draft proposal shall be
designed to augment and coordinate with existing energy efficiency and renewable energy
programs, and shall not propose use of auction proceeds for projects already funded under other
programs. The proposal for allocation of proceeds in subsections (a)(1), (2), and (3) shall be one
that best achieves the purposes of the law, namely, lowering carbon emissions and minimizing costs
to consumers over the long term. The office shall hold a public hearing and accept public comment
on the draft proposal in accordance with chapter 35 of title 42 (the “Administrative Procedure Act”).
Once the proposal is final, the office shall authorize the disbursement of funds in accordance with
the final plan.

(d) The office shall prepare, in consultation with council and board, a report by April 15 of
each year describing the implementation and operation of RGGI, the revenues collected and the
expenditures, including funds that were allocated to the energy efficiency and renewable energy
programs, and the individuals, businesses and vendors that received funding, made under this
section, the statewide energy efficiency and carbon reduction programs, and any recommendations
for changes to law relating to the state’s energy conservation or carbon reduction efforts. The report
shall be made public and be posted electronically on the website of the office of energy resources
and shall also be submitted to the general assembly.

SECTION 2. Section 39-2-1.2 of the General Laws in Chapter 39-2 entitled “Duties of
Utilities and Carriers” is hereby amended to read as follows:

(a) In addition to costs prohibited in § 39-1-27.4(b), no public utility distributing or providing heat, electricity, or water to or for the public shall include as part of its base rate any expenses for advertising, either direct or indirect, that promotes the use of its product or service, or is designed to promote the public image of the industry. No public utility may furnish support of any kind, direct or indirect, to any subsidiary, group, association, or individual for advertising and include the expense as part of its base rate. Nothing contained in this section shall be deemed as prohibiting the inclusion in the base rate of expenses incurred for advertising, informational or educational in nature, that is designed to promote public safety conservation of the public utility's product or service. The public utilities commission shall promulgate such rules and regulations as are necessary to require public disclosure of all advertising expenses of any kind, direct or indirect, and to otherwise effectuate the provisions of this section.

(b) Effective as of January 1, 2008, and for a period of twenty (20) years thereafter, each electric distribution company shall include a charge per kilowatt-hour delivered to fund demand-side management programs. The 0.3 mills per kilowatt-hour delivered to fund renewable energy programs shall remain in effect until December 31, 2028. The electric distribution company shall establish and, after July 1, 2007, maintain, two (2) separate accounts, one for demand-side management programs (the "demand-side account"), which shall be funded by the electric demand-side charge and administered and implemented by the distribution company, subject to the regulatory reviewing authority of the commission, and one for renewable energy programs, which shall be administered by the Rhode Island commerce corporation pursuant to § 42-64-13.2 and shall be held and disbursed by the distribution company as directed by the Rhode Island commerce corporation for the purposes of developing, promoting, and supporting renewable energy programs.

During the time periods established in this subsection, the commission may, in its discretion, after notice and public hearing, increase the sums for demand-side management and renewable resources. In addition, the commission shall, after notice and public hearing, determine the appropriate charge for these programs. The office of energy resources, and/or the administrator of the renewable energy programs, may seek to secure for the state an equitable and reasonable portion of renewable energy credits or certificates created by private projects funded through those programs. As used in this section, "renewable energy resources” shall mean: (1) Power generation technologies, as defined in § 39-26-5, "eligible renewable energy resources,” including off-grid and on-grid generating technologies located in Rhode Island, as a priority; (2) Research and development activities in Rhode Island pertaining to eligible renewable energy resources and to
other renewable energy technologies for electrical generation; or (3) Projects and activities directly related to implementing eligible renewable energy resources projects in Rhode Island. Technologies for converting solar energy for space heating or generating domestic hot water may also be funded through the renewable energy programs. Fuel cells may be considered an energy efficiency technology to be included in demand-side management programs. Special rates for low-income customers in effect as of August 7, 1996, shall be continued, and the costs of all of these discounts shall be included in the distribution rates charged to all other customers. Nothing in this section shall be construed as prohibiting an electric distribution company from offering any special rates or programs for low-income customers which are not in effect as of August 7, 1996, subject to the approval by the commission.

(1) The renewable energy investment programs shall be administered pursuant to rules established by the Rhode Island commerce corporation. Said rules shall provide transparent criteria to rank qualified renewable energy projects, giving consideration to:

(i) The feasibility of project completion;
(ii) The anticipated amount of renewable energy the project will produce;
(iii) The potential of the project to mitigate energy costs over the life of the project; and
(iv) The estimated cost per kilowatt-hour (KWh) of the energy produced from the project.

(c) [Deleted by P.L. 2012, ch. 241, art. 4, § 14.]

(d) The chief executive officer of the commerce corporation is authorized and may enter into a contract with a contractor for the cost-effective administration of the renewable energy programs funded by this section. A competitive bid and contract award for administration of the renewable energy programs may occur every three (3) years and shall include, as a condition, that after July 1, 2008, the account for the renewable energy programs shall be maintained and administered by the commerce corporation as provided for in subsection (b) of this section.

(e) Effective January 1, 2007, and for a period of twenty-one (21) years thereafter, each gas distribution company shall include, with the approval of the commission, a charge per deca therm delivered to fund demand-side management programs (the "gas demand-side charge"), including, but not limited to, programs for cost-effective energy efficiency, energy conservation, combined heat and power systems, and weatherization services for low-income households.

(f) Each gas company shall establish a separate account for demand-side management programs (the "gas demand-side account") that shall be funded by the gas demand-side charge and administered and implemented by the distribution company, subject to the regulatory reviewing authority of the commission. The commission may establish administrative mechanisms and procedures that are similar to those for electric demand-side management programs administered...
under the jurisdiction of the commission and that are designed to achieve cost-effectiveness and high, life-time savings of efficiency measures supported by the program.

(g) The commission may, if reasonable and feasible, except from this demand-side management charge:

(1) Gas used for distribution generation; and
(2) Gas used for the manufacturing processes, where the customer has established a self-directed program to invest in and achieve best-effective energy efficiency in accordance with a plan approved by the commission and subject to periodic review and approval by the commission, which plan shall require annual reporting of the amount invested and the return on investments in terms of gas savings.

(h) The commission may provide for the coordinated and/or integrated administration of electric and gas demand-side management programs in order to enhance the effectiveness of the programs. Such coordinated and/or integrated administration may after March 1, 2009, upon the recommendation of the office of energy resources, be through one or more third-party entities designated by the commission pursuant to a competitive selection process.

(i) Effective January 1, 2007, the commission shall allocate, from demand-side management gas and electric funds authorized pursuant to this section, an amount not to exceed three percent (3%) of such funds on an annual basis for the retention of expert consultants, and reasonable administration costs of the energy efficiency and resource management council associated with planning, management, and evaluation of energy-efficiency programs, renewable energy programs, system reliability least-cost procurement, and with regulatory proceedings, contested cases, and other actions pertaining to the purposes, powers, and duties of the council, which allocation may by mutual agreement, be used in coordination with the office of energy resources to support such activities.

(j) Effective January 1, 2016, the commission shall annually allocate from the administrative funding amount allocated in subsection (i) from the demand-side management program as described in subsection (i) as follows: (1) for the energy efficiency and resource management council, no more than forty percent (40%) for the purposes identified in subsection (i) and (2) sixty percent (60%) of three percent (3%) from the demand side management gas and electric funds annually to the office of energy resources for activities associated with planning, management, and evaluation of energy-efficiency programs, renewable energy programs, system reliability, least-cost procurement, and with regulatory proceedings, contested cases, and other actions pertaining to the purposes, powers, and duties of the office of energy resources and shall have exclusive authority to direct the use of the office administrative and programmatic funds.
(k) On April 15, of each year, the office and the council shall submit to the governor, the president of the senate, and the speaker of the house of representatives, separate financial and performance reports regarding the demand-side management programs, including the specific level of funds that were contributed by the residential, municipal, and commercial and industrial sectors to the overall programs; the businesses, vendors, and institutions that received funding from demand-side management gas and electric funds used for the purposes in this section; and the businesses, vendors, and institutions that received the administrative funds for the purposes in subsections (i) and (j). These reports shall be posted electronically on the websites of the office of energy resources and the energy efficiency and resources management council.

(l) On or after August 1, 2015, at the request of the Rhode Island infrastructure bank, each electric distribution company, except for the Pascoag Utility District and Block Island Power Company, shall remit two percent (2%) of the amount of the 2014 electric demand-side charge collections to the Rhode Island infrastructure bank.

(m) On or after August 1, 2015, at the request of the Rhode Island infrastructure bank, each gas distribution company shall remit two percent (2%) of the amount of the 2014 gas demand-side charge collections to the Rhode Island infrastructure bank.

(n) Effective January 1, 2022, the commission shall allocate, from demand-side management gas and electric funds authorized pursuant to this section, five million dollars ($5,000,000) of such funds on an annual basis to the Rhode Island infrastructure bank. Gas and electric demand-side funds transferred to the Rhode Island infrastructure bank pursuant to this section shall be eligible to be used in any energy efficiency, renewable energy, clean transportation, clean heating, energy storage, or demand-side management project financing program administered by the Rhode Island infrastructure bank notwithstanding any other restrictions on the use of such collections set forth in this chapter. The infrastructure bank shall report annually to the commission within ninety (90) days of the end of each calendar year how collections transferred under this section were utilized.

(o) The Rhode Island office of energy resources, in coordination with the energy efficiency and resource management council, and following consultation with the public utilities commission and division of public utilities and carriers, shall issue a request for proposals for the cost effective administration and implementation of statewide energy efficiency programs funded by this section no later than September 30, 2023. The draft request for proposals shall be reviewed through at least one technical session at the public utilities commission prior to issuance. Public utilities commission approval shall not be required. The Rhode Island office of energy resources, in coordination with the energy efficiency and resource management council, shall evaluate proposals
and determine whether energy efficiency administration and implementation by the electric and gas
distribution company or a third-party is likely to achieve the most net benefits for electric and gas
customers in Rhode Island. After January 1, 2025, the office of energy resources may, periodically,
and at its discretion, issue additional requests for proposals for the administration and
implementation of state-wide energy efficiency programs funded through this chapter of an electric
distribution company as defined in § 39-1-2(a)(12) or gas distribution company included as a
public utility in § 39-1-2(a)(20) that has greater than one hundred thousand (100,000) customers.

(i) Nothing in this chapter shall prohibit the electric and/or gas distribution company from
submitting a proposal to administer and implement the state energy efficiency programs.

(ii) If the office of energy resources, in coordination with the energy efficiency and
resource management council, determines that the use of a third-party administrator is likely to
achieve the most net benefits for electric and gas customers in Rhode Island, it shall file its
recommendation with the public utilities commission, which shall docket and rule on the matter
pursuant to its general statutory authorization.

(iii) If the commission determines that the recommended third-party administrator is in the
interest of Rhode Island utility customers, it shall provide for the full cost recovery for the third-
party administrator consistent with the terms of the approved contract, and which shall reflect the
overall annual budget approved by the commission. The third-party administrator shall be subject
to all the requirements set forth for the electric and gas distribution company per § 39-1-27.7.

(iv) If the commission determines that a third-party administrator will administer the state
energy efficiency programs on or after June 1, 2024, the commission shall direct the gas and electric
distribution company to collect and transfer the gas and electric energy efficiency funds to the third-
party administrator for the annual state energy efficiency program beginning with the program year
and thereafter for the remaining program years. The gas and electric distribution shall transfer the
annual administrative funds to the office of energy resources and energy efficiency and resource
management council.

(v) If a third-party administrator implements the annual energy efficiency programs then
they shall be required to develop and design the annual state energy efficiency program with the
office of energy resources and energy efficiency and resource management council, including a
vote by the energy efficiency and resource management council prior to the third-party
administrator filing the annual program plan to the public utilities commission for review and a
decision.

(vi) The third-party administrator shall file the annual state energy efficiency program plan
to the public utilities commission for review and approval no later than September 30, 2024, and
annually thereafter on such date.

(vii) The third-party administrator shall provide all information requested by the office of
energy resources, energy efficiency and resource management council, division of public utilities
and carriers and the public utilities commission, including responses to data requests, which are
necessary for the agencies to carry out their respective oversight roles, and shall be accountable to
the same standards as the utility with administering and implementing energy efficiency, system
reliability and least cost procurement standards and goals in accordance with §§ 39-1-27.7 and 39-
2-1.2.

(viii) If the office does not recommend advancement of a third-party administrator, the
electric and gas distribution company shall continue to administer statewide energy efficiency
programs.

SECTION 3. Chapter 42-6.2 of the General Laws entitled "2021 Act on Climate" is hereby
amended by adding thereto the following section:

42-6.2-3.1. Funding for the council.

There is hereby established a restricted receipt account in the general fund of the state and
housed in the budget of the department of administration entitled "RGGI-executive climate change
coordinating council projects." The express purpose of this account is to record receipts and
expenditures allocated pursuant to § 23-82-6(7).

The Rhode Island executive climate change coordinating council shall report annually to
the governor and general assembly within one hundred twenty (120) days of the end of each
calendar year how the funds were used to achieve the statutory objectives of the 2021 Act on
Climate.

SECTION 4. This article shall take effect upon passage.
